

The founder and Executive Director of Natview Foundation for Technology Innovation (NFTI) is Nuradeen Maidoki.

Here's a more detailed look at Nuradeen Maidoki and his work:

- **Founder & Executive Director:**

Nuradeen Maidoki is the founder and Executive Director of Natview Foundation for Technology Innovation (NFTI).

- **Background:**

He holds a Master's in Computer Science and IT Entrepreneurship from Brandeis University, a Fellowship in Predictive Data Analytics from Harvard University, and a certification in Big Data & Artificial Intelligence from MIT.

- **Areas of Focus:**

Nuradeen is passionate about AI, Machine Learning, and Human Capital Development.

- **Natview Foundation:**

Natview Foundation for Technology Innovation (NFTI) is a non-profit organization focused on technology innovation and development.

- **Other roles:**

Nuradeen is a member of several boards in Nigeria and Africa.

- **LinkedIn Profile:**

You can find his LinkedIn profile here: <https://www.linkedin.com/in/nuradeen-maidoki-a53b2539> [4].

- **Instagram:**

You can find his instagram profile here: <https://www.instagram.com/deeny05/> [1]

- **X:**

The founder and Executive Director of Natview Foundation for Technology Innovation (NFTI) is Nuradeen Maidoki, and his social media handles are @deeny05 on Instagram and @nuradeen_maidoki on Twitter.

Here's a breakdown of his role and some of his background:

- **Founder and Executive Director:** Nuradeen Maidoki is the founder and Executive Director of Natview Foundation for Technology Innovation (NFTI).
- **Social Media:**
 - **Instagram:** @deeny05

- **Twitter:** @nuradeen_maidoki
- **Background:**
- He holds a Master's in Computer Science and IT Entrepreneurship from Brandeis University.
- He has a Fellowship in Harvard University on Predictive Data Analytics and a Certification in Big Data & Artificial Intelligence from Massachusetts Institute of Technology (MIT).

The founder and Executive Director of Natview Foundation for Technology Innovation (NFTI) is Nuradeen Maidoki.

Here's a more detailed look:

Nuradeen Maidoki: is the founder and Executive Director of Natview Foundation for Technology Innovation (NFTI).

He is also known as @deeny05 on Instagram.

He presented the Kaduna State General Household Survey analytics dashboard at the KDGHS2020 event.

He spoke at the 2022 Kaduna Datathon finals, where young innovators from across Nigeria pitched their solutions.

He is a competent professional with strong skills in automating the tracking of public sector projects and budget performance for effective and efficient delivery.

Nuradeen Maidoki

Founder, Executive Director

NURADEEN MAIDOKI is the Founder & Executive Director of NFTI. He is an experienced data scientist with a passion for Monitoring and Evaluation across the Public Sector. He has worked with several international development partners like DFID, NESG as an embedded consultant supporting some Federal and State Government Institutions.

Nuradeen has a Masters in Computer Science and IT Entrepreneurship from Brandeis University Boston, Fellowship in Harvard University on Predictive Data Analytics and Certification in Big Data & Artificial Intelligence from Massachusetts Institute of Technology (MIT) in Boston. He is also currently studying for a Masters in Extension Studies in Data Science from Harvard University. Nuradeen is passionate about the field of data science and performance tracking and has piloted and managed several performance evaluation assignments across Africa. He is a member of several boards in Nigeria and Africa.

The Principal Private Secretary (PPS) to Kaduna State Governor Uba Sani, Prof. Ayuba Bello, has commended the governor for his remarkable achievements within a short time in office, stating that no administration in the state's history has accomplished such feats.

Prof. Ayuba made this assertion on Thursday while interacting with journalists in Kaduna during an end-of-year gathering.

He highlighted the governor's numerous accomplishments over the past 18 months, noting that the list shared was merely a summary of the administration's successes.

The PPS expressed optimism about the governor's commitment to sustaining and surpassing these milestones, emphasizing the administration's dedication to the development and progress of Kaduna State.

"This is not a speech-making event. It is just an occasion for us to fraternise and unwind, more so as the year is winding down. But as we all know, where two or three journalists are gathered, the discussion almost always gravitates towards politics and governance. For this reason, I want to give you a summary of the unprecedented achievements of the Executive Governor of Kaduna State, Senator Uba Sani in the last 18 months. No doubt, there has never been any administration in the history of Kaduna State, which achieved so much, within a short time and with limited resources, like the Government of Senator Uba Sani.

"In less than two years, the Governor Uba Sani administration in Kaduna State has been rapidly transforming rural communities through massive infrastructural development, revival and revitalization of the health and educational sectors, frontally fighting poverty, and strengthening partnership with security forces to secure the State. In the area of security, the Government has forged a solid partnership with federal security forces to secure Kaduna State, by giving them logistics support to enhance their operations.

Governor Uba Sani distributed 150 operational vehicles and 500 motorcycles to them and the Kaduna State Vigilance Service (KADVS) to boost their operations. Besides that, the Governor has recently signed the Kaduna State Security Trust Fund Bill into Law. The Trust Fund will raise funds for the acquisition and deployment of even more security equipment, personnel and materials as well as training of security personnel.

“Through the efforts of the Peace Dialogue Group established by the Kaduna State Government in collaboration with federal agencies and security services, peace has returned to Birnin Gwari. On November 29, the Governor reopened the famous and strategic Birnin Gwari Market which had been closed for about 10 years, thus signalling the commencement of commercial activities. Above all, the long-abandoned Birnin Gwari Road has come back to life. Similarly, the Kidandan market in Giwa local government of Kaduna State, which had not been patronised for several years owing to insecurity, has been opened. Indeed, this marks the beginning of the return of peace and stability to Giwa local government.

Significantly, Governor Uba Sani has been embarking on a massive rural development by extending infrastructure development to all local government areas, with the goal of supporting rural communities to achieve rapid economic growth and development.

“In this regard, the Government has undertaken 68 road projects, covering a total of approximately 700 kilometres, across the three senatorial districts. Human Capital Development is one of the pivots of Governor Uba Sani’s administration and for this reason, it has improved access to education and revived the health sector. So far, the Kaduna State Government has built 62 new secondary schools, comprising 39 Junior and 23 Senior Secondary Schools, across the three senatorial districts. Besides, approval has been given for the construction of an additional 50 secondary schools across the state and upon completion, these new schools are expected to enrol over 100,000 students, further solidifying Kaduna State’s commitment to providing inclusive and accessible education for all. Also, 2,000 qualified teachers have been recruited, awaiting deployment to these newly completed schools.

“In addition, the Government has constructed 2,326 new classrooms, renovated 707 classrooms, supplied 30,742 two-seater pupil’s furniture, provided 3,704 Teachers Furniture, and constructed 918 VIP Cubicle Toilets and 51 hand pump boreholes in schools across the State.

“Significantly, the administration is building three Vocational and Technological Skills Acquisition Cities to equip youths with the requisite skills to enable them to take up jobs in industries and other businesses. The Skills Cities will graduate at least 12,000 youths annually.

In addition, the Government is remodelling the Panteka Market in Kaduna to become a major centre for skills acquisition, engaging over 38,000 artisans. A

comprehensive infrastructure upgrade is being carried out to make it an international centre for skills acquisition and job creation. Besides, the Kaduna State Government is collaborating with the National Board for Technical

“Education (NBTE) to provide Nigerian Skills Qualifications Framework (NSQF) certification for graduates of the Skills Cities and Panteka Market. Specifically, Governor Uba Sani is carrying out a surgical operation in the healthcare sector because he wants to deliver a top-notch healthcare system that addresses the needs of the people. The administration is working day and night to complete the ultra-modern Specialist Hospital at Millennium City, Kaduna. On Wednesday, 27th November 2024, the Governor commissioned the remodelled, upgraded and fully equipped Dabo Lere Memorial Hospital, Kaduna.

“He has embarked on the remodelling, equipping and upgrading of 13 General Hospitals in the 3 Senatorial Zones of the State. This includes General Hospital Gwantu, General Hospital Rigasa, General Hospital Maigana, and in Sanga, Igabi and Soba local governments respectively, as some of the hospitals that have been remodelled, equipped and upgraded.

“Others are Patrick Ibrahim Yakowa, Kafanchan, in Jema local government; General Hospital Giwa, in Giwa local government and Ikara General Hospital, located at Kara local government. The rest are General Hospital Sabon Tasha, Chikun LGA; General Hospital Saminaka, Lere LGA, and General Hospital Kachia, Kachia LGA.

“Governor Uba Sani has placed agriculture at the centre of Kaduna State’s development agenda. In the last 18 months, Kaduna State has become a beacon of hope for smallholder farmers, an engine of economic growth, and a model of agricultural excellence. Under the remarkable palliative program, Sustainable Livelihoods through Social Interventions and Economic Empowerment, the Get Back to the Farm initiative has breathed new life into the agricultural sector.

“Government has distributed vital inputs-high-quality seeds, fertilizers, agrochemicals, and farming equipment to 41,693 smallholder farmers and cooperatives across all 23 LGAs. This initiative is a game-changer for our farmers, restoring their livelihoods and driving increased productivity across the state.

“Significantly, the Uba Sani administration undertook the largest Free Fertilizer Distribution in Kaduna State’s history, with the distribution of 500 trucks of fertilizer from which 240,000 bags were given out free to 120,000 smallholder farmers. The Government has also invested heavily in both mechanization and micro-mechanization of the agricultural sector. Indeed, the last time the State invested in mechanization through the procurement of Tractors was in 2010 but this Government has procured 12 heavy-duty tractors that can handle large-scale commercial farming and complex and difficult farming operations.

“Since he assumed office in May 2023, Governor Uba Sani has placed a high premium on bringing succour to the poor, vulnerable and underserved in Kaduna State. In this regard, he has been carrying out pro-poor measures to bring needed relief to Kaduna State citizens, first by signing an Executive Order on Financial Inclusion. By so doing, the Governor has shown commitment to addressing the exclusion of the poor, under-served and vulnerable from financial services and ensuring that they benefit from social intervention programs of Kaduna State and the Federal Government.

“The aim is to empower people with tools like savings accounts, credit, insurance, and digital payment options, enabling them to participate in the formal financial system, manage their finances, and build economic resilience.

In addition, the Kaduna State Government has forged a significant partnership with Google Africa for the ArewaTech4Ladies Skills Development Project.

“Through this collaboration, it has empowered 5,000 women and girls with skills in data science, Artificial Intelligence and entrepreneurial applications of digital technologies. Through the Kaduna State Enterprise Development Agency (KADEDA), the Government has supported 8,649 nano and micro businesses with grants to expand their business operations. The support ranged from N300,000, N200,000, N150,000, N100,000, to N50,000.

“The poverty alleviation programme, “A Kori Talauchi programme” has empowered 4,912 underserved women across the state. Furthermore, the

Government has supported another 100 food vendors at the Kaduna Food Festival 2024, which took place from April 11th to 14th 2024 at Murtala Square, Kaduna. The festival was a vibrant celebration of the rich culinary diversity of Kaduna and Northern Nigeria, designed to showcase a spectrum of local culinary art and street food. The festival attracted more than 2,000 guests daily, providing women with the platform to showcase their local businesses.

“Significantly, Kaduna State Government has instituted a Revolving Loan Scheme to enable civil servants to meet financial needs with seed funds of five hundred million Naira (N500,000,000) at a single-digit rate of five percent (5%). This initiative aims to promote access to funds for civil servants to meet financial obligations. More so, the administration has been clearing pension arrears. The State Government has to date paid approximately four billion, seven hundred million Naira (N4.7 bn) for clearance of death and gratuity benefits.

“As servants of the people, the Uba Sani Government places a great premium on accountability. Transparency and accountability are not principles to be trifled with. Last month, the Centre for Fiscal Transparency and Public Integrity Watch (CeFTP|W) ranked Kaduna State as the first subnational in its Transparency and Public Integrity Index. The ranking which was done for the entire 36 states and the Federal Capital Territory, placed Kaduna State as number 1, with a score of 51. 42, in its 2024 Integrity Index Report. CeFTPIW is a non-governmental organization established in 2016 to promote good governance, by strengthening transparency and accountability in public institutions and organizations. In addition, Kaduna State came second out of thirty-six (36) states in the ICAN Accountability and Transparency Index, reflecting its commitment to transparency, accountability, and effective resource utilization.

“In the last 18 months, the Internally Generated Revenue (IGR) profile of Kaduna State has improved. Last November, the National Bureau of Statistics (NBS) released the Internally Generated Revenue (IGR) of all in the 36 states and the Federal Capital Territory (FCT) and Kaduna State raked in N62.49 billion last year, emerging the state with the highest IGR earnings in the north. Governor Uba Sani’s policy of financial inclusion and widening the tax net as well as reorganising the entire Kaduna State Internal Revenue Service (KADIRS) is responsible for this feat.

“Since he came on board, KADIRS has been expanding the tax net in a horizontal manner as against the vertical approach of the past which led to stagnation. Above all, the policies of the Uba Sani administration which have a human face, have made businesses and companies that have left Kaduna State in the past, to return. Coupled with that, he has initiated a lot of business-friendly policies which are having positive impact on revenue generation. In addition, the rural transformation of the Kaduna State Government has improved voluntary tax compliance because people can see how their money is being spent.

“Besides, KADIRS is effectively deploying technology in its operations to ensure effective service delivery to taxpayers.

A major component of the Uba Sani Governance Agenda is Nurturing Citizen Engagement, to carry the people along in decision-making processes, especially on how their resources are allocated.

“Consequently, the Government has been holding Town Hall Meetings and consultations with critical stakeholders like Traditional Rulers, Religious Leaders, Elders/Influential Citizens, and Leaders of Women and Youth Groups, as well as Development Organizations, on major Government policies and programmes, especially the yearly budget proposal.

This is just the tip of the iceberg of what Comrade, Senator, Dr, Malam Uba Sani has accomplished in the last 18 months as the Governor of Kaduna State,” Ayuba stated.

The selection process for the Click-On Kaduna Data Science Fellowship Program (DSFP) involves an online application, essay submission, video pitch, a computer-based test (CBT), and a final interview with a selection panel.

Here's a breakdown of the stages:

- **Initial Application:**
 - Applicants must fill out an online application form, providing details like their educational background and the number of hours they can dedicate to the fellowship.
 - They also need to submit a valid means of identification.
 - A key part of the initial application is an essay, where applicants explain why they deserve a spot in the fellowship.

- **Video Application:**
 - Selected applicants are invited to upload a 2-minute video explaining why they deserve a slot in the program.
 - The video application is a crucial stage for showcasing their skills and motivation.
- **Computer-Based Test (CBT):**
 - Candidates who successfully pass the video application stage are invited to take a CBT.
 - The CBT assesses technical skills, critical thinking abilities, and problem-solving capacity.
- **Final Interview:**
 - Those who excel in the CBT are invited to a final interview with a selection panel.
 - This interview allows the selection committee to further evaluate the candidates' suitability for the program.

The Click-on Kaduna Data Science Fellowship Program (DSFP) is a 5-year initiative, part of Kaduna State's Data Revolution Plan, aimed at building human capital in data science and empowering young people with data-driven skills for informed decision-making.

Here's a more detailed breakdown:

Purpose:

The program aims to develop data science expertise within Kaduna State, equipping individuals with the skills to collect, analyze, and visualize data for evidence-based decision-making.

Data Revolution Plan:

The DSFP is a key component of the Kaduna State's Data Revolution Plan, which focuses on strengthening data collection and utilization for better governance and development.

Scope:

The program focuses on developing human capital in data science, with a goal of empowering young talents with cutting-edge tools for informed decision-making.

Duration:

The program is a 5-year project, with the aim of empowering 200 youths in cohorts, providing them with the necessary skills to excel in data-driven careers.

Skills Development:

The DSFP equips fellows with skills in data collection, rigorous analysis, and compelling visualization, enabling them to leverage data for impactful decision-making.

Impact:

DSFP fellows are highly sought after post-fellowship, and the program has a strong focus on data storytelling and engaging audiences through impactful reporting using tools like Power BI.

Specialization:

The program is introducing specialization courses in areas like AI and Machine Learning, Data Engineering, and GIS, reflecting the growing demand for data-driven expertise.

Alumni:

The program has a strong alumni network, with alumni guiding and mentoring the next cohort of fellows, fostering a legacy of data-driven excellence in Kaduna State.

Partnerships:

The program benefits from partnerships with organizations like DataCamp, which provides fellows with access to online learning resources and courses.

Social Impact:

The DSFP aims to empower individuals to use data to tackle social problems and drive innovation in various sectors, including AI, healthcare, finance, and social impact.

Website:

The program's website is datascience.click-onkaduna.ng.

For the past 4 years in click on Kaduna DSFP 190 fellows have been trained, the first cohort having 30 fellows while the second, third and fourth have 40 making a total of 190 trained fellows within 4 years.
